

GetNodeAddress Get caller's node ID and network number

#include <AppleTalk.h>

AppleTalk Manager

OSErr **GetNodeAddress**(*myNode*, *myNet*);
short **myNode*; Current node ID
short **myNet*; Current network number
 returns Error Code; 0=no error

GetNodeAddress returns the current node ID and network number of the caller.

myNode points to the caller's current network node ID.

myNet points to the current network number of the caller.

Returns: an operating system Error Code. It will be one of:

noErr	(0)	No error
noMPPErr	(-3102)	MPP driver not installed

Notes: If *myNet* contains 0, this means that a bridge has not yet been found.
