Edition Manager Dialog Boxes

The **Edition Manager** supports three dialog boxes: publisher, subscriber, and options dialog boxes. Your application can display simple dialog boxes that appear centered on the user's screen, or you can customize your dialog boxes.

Unlike the **Standard File** routines, the **NewPublisherDialog** and the **NewSubscriberDialog** functions allow you to specify the initial volume reference number and directory ID so that there can be one default location for editions for all applications.

Use the **NewSubscriberDialog** function to display the subscriber dialog box on the user's screen.
